

Wireless Printing from Mac OS X

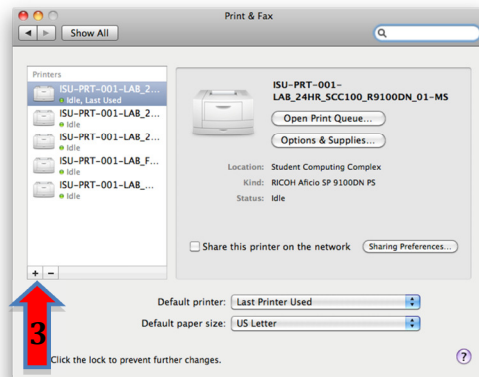

1. Click the **Apple** located in the top left corner of the display and select **System Preferences** from the drop down menu.

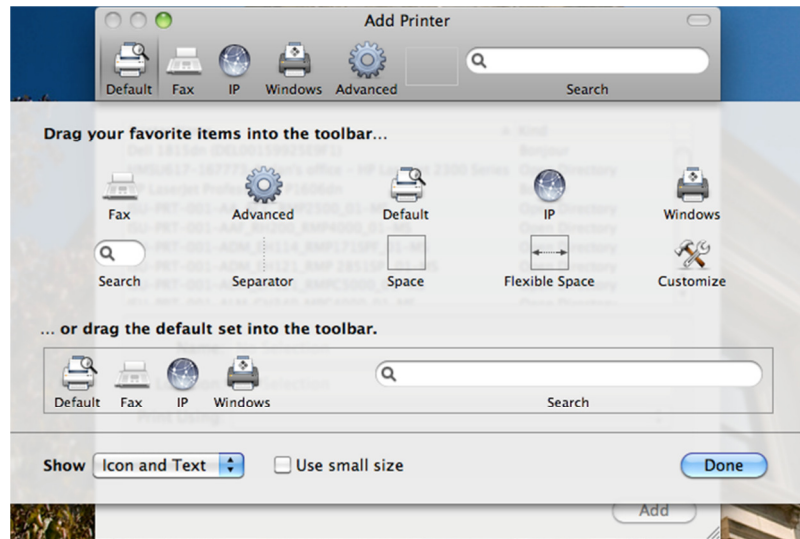

2. Select **Print & Fax** in the System Preferences Window. The Print & Fax Window will now open.

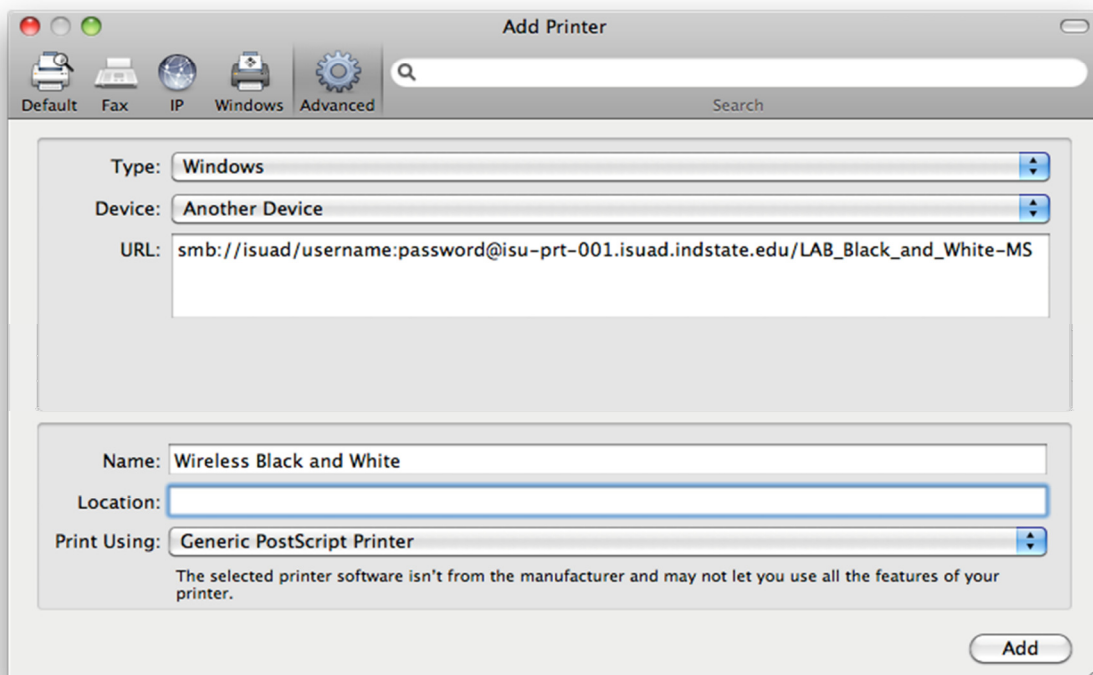

3. Click the **plus sign** below the printer list in the Print & Fax window.

4. Right click (⌘ + Click) on the toolbar and select **Customize Toolbar**. Click and drag the **Advanced** icon to the toolbar and then click **Done**.

5. Click **Advanced** and select **Windows** from the **Type** drop down menu. Enter the URL listed in the box below, replacing username and password with your portal id and password. Make sure to select **Generic PostScript Printer** from the **Print Using** drop down menu. Click **Add** when finished.

FOR COLOR PRINTING:

Use these instructions for the color printer as well, but replace **LAB_Black_and_White-MS** with **LAB_Color-MS**. Be sure to change the name to Wireless Color.
